About Page

Page notes

I decided to keep the design fairly minimal to allow ease of use. I really enjoyed the design side of building a web page

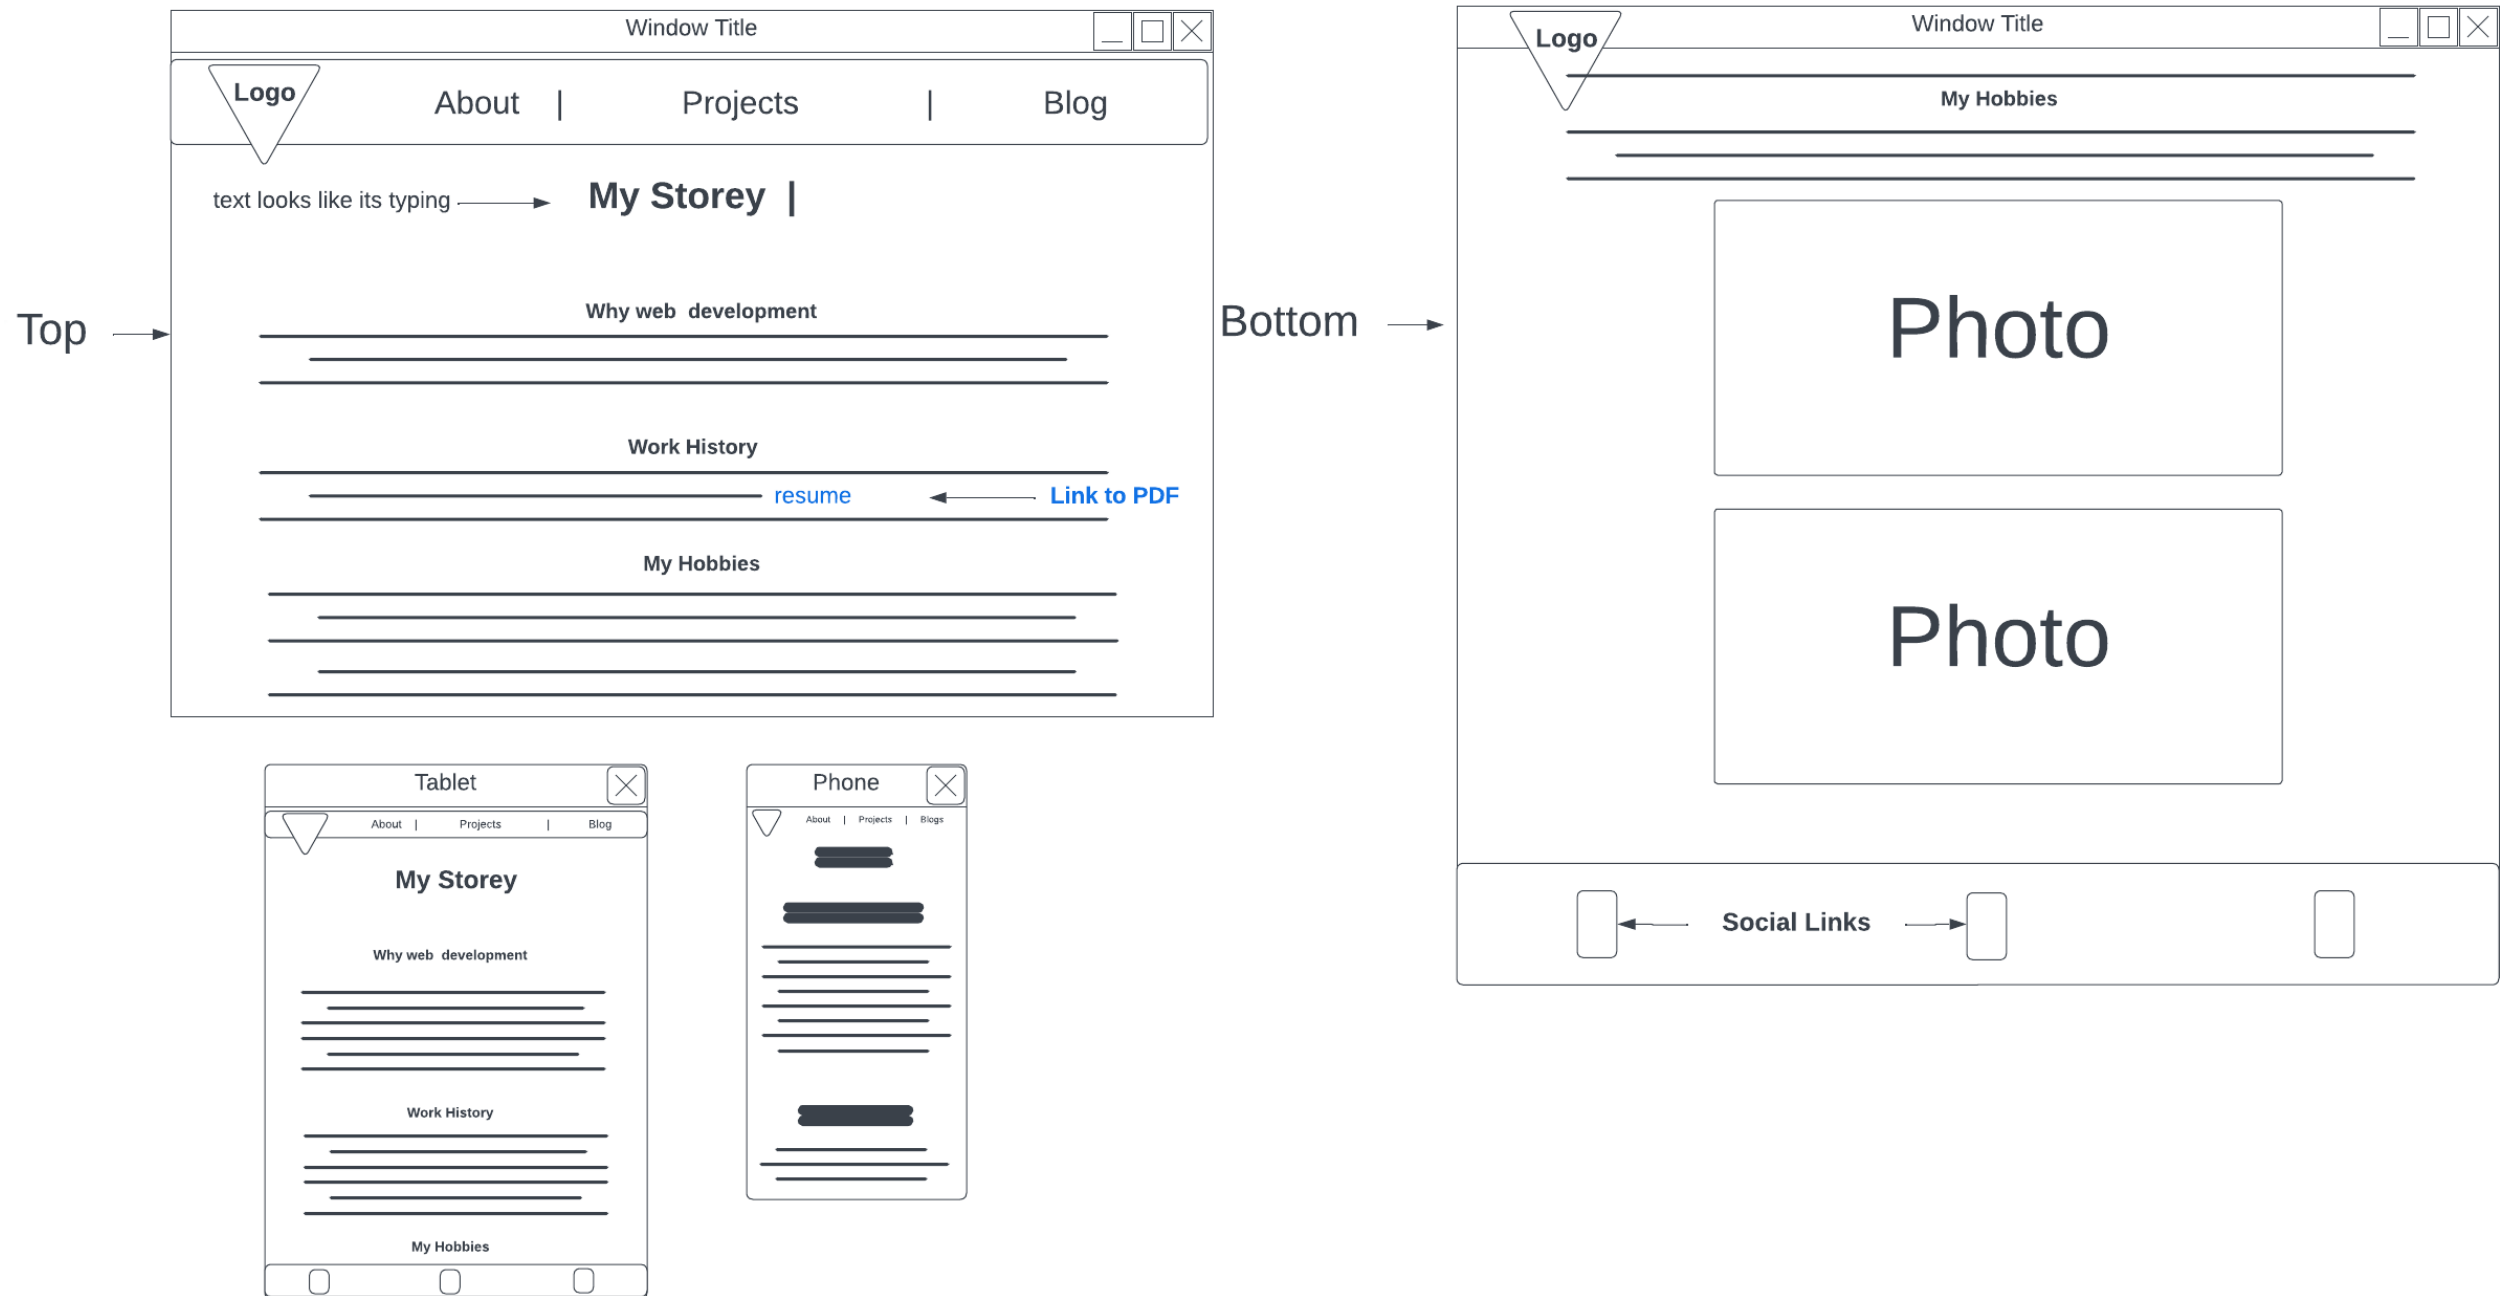

Tablet Screen Min Width - 490px

Phone Screen

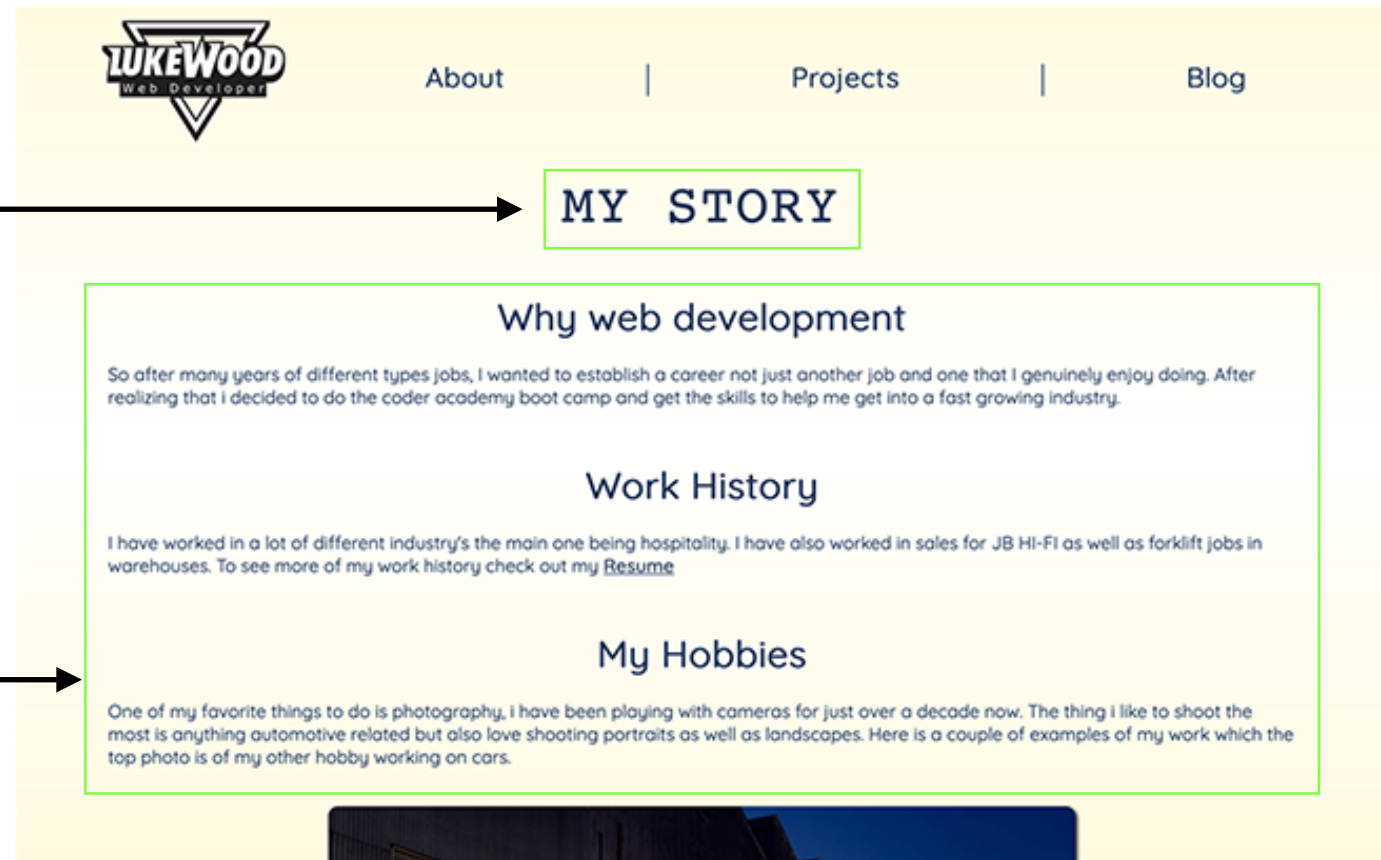

About Page - Wireframe

About Page

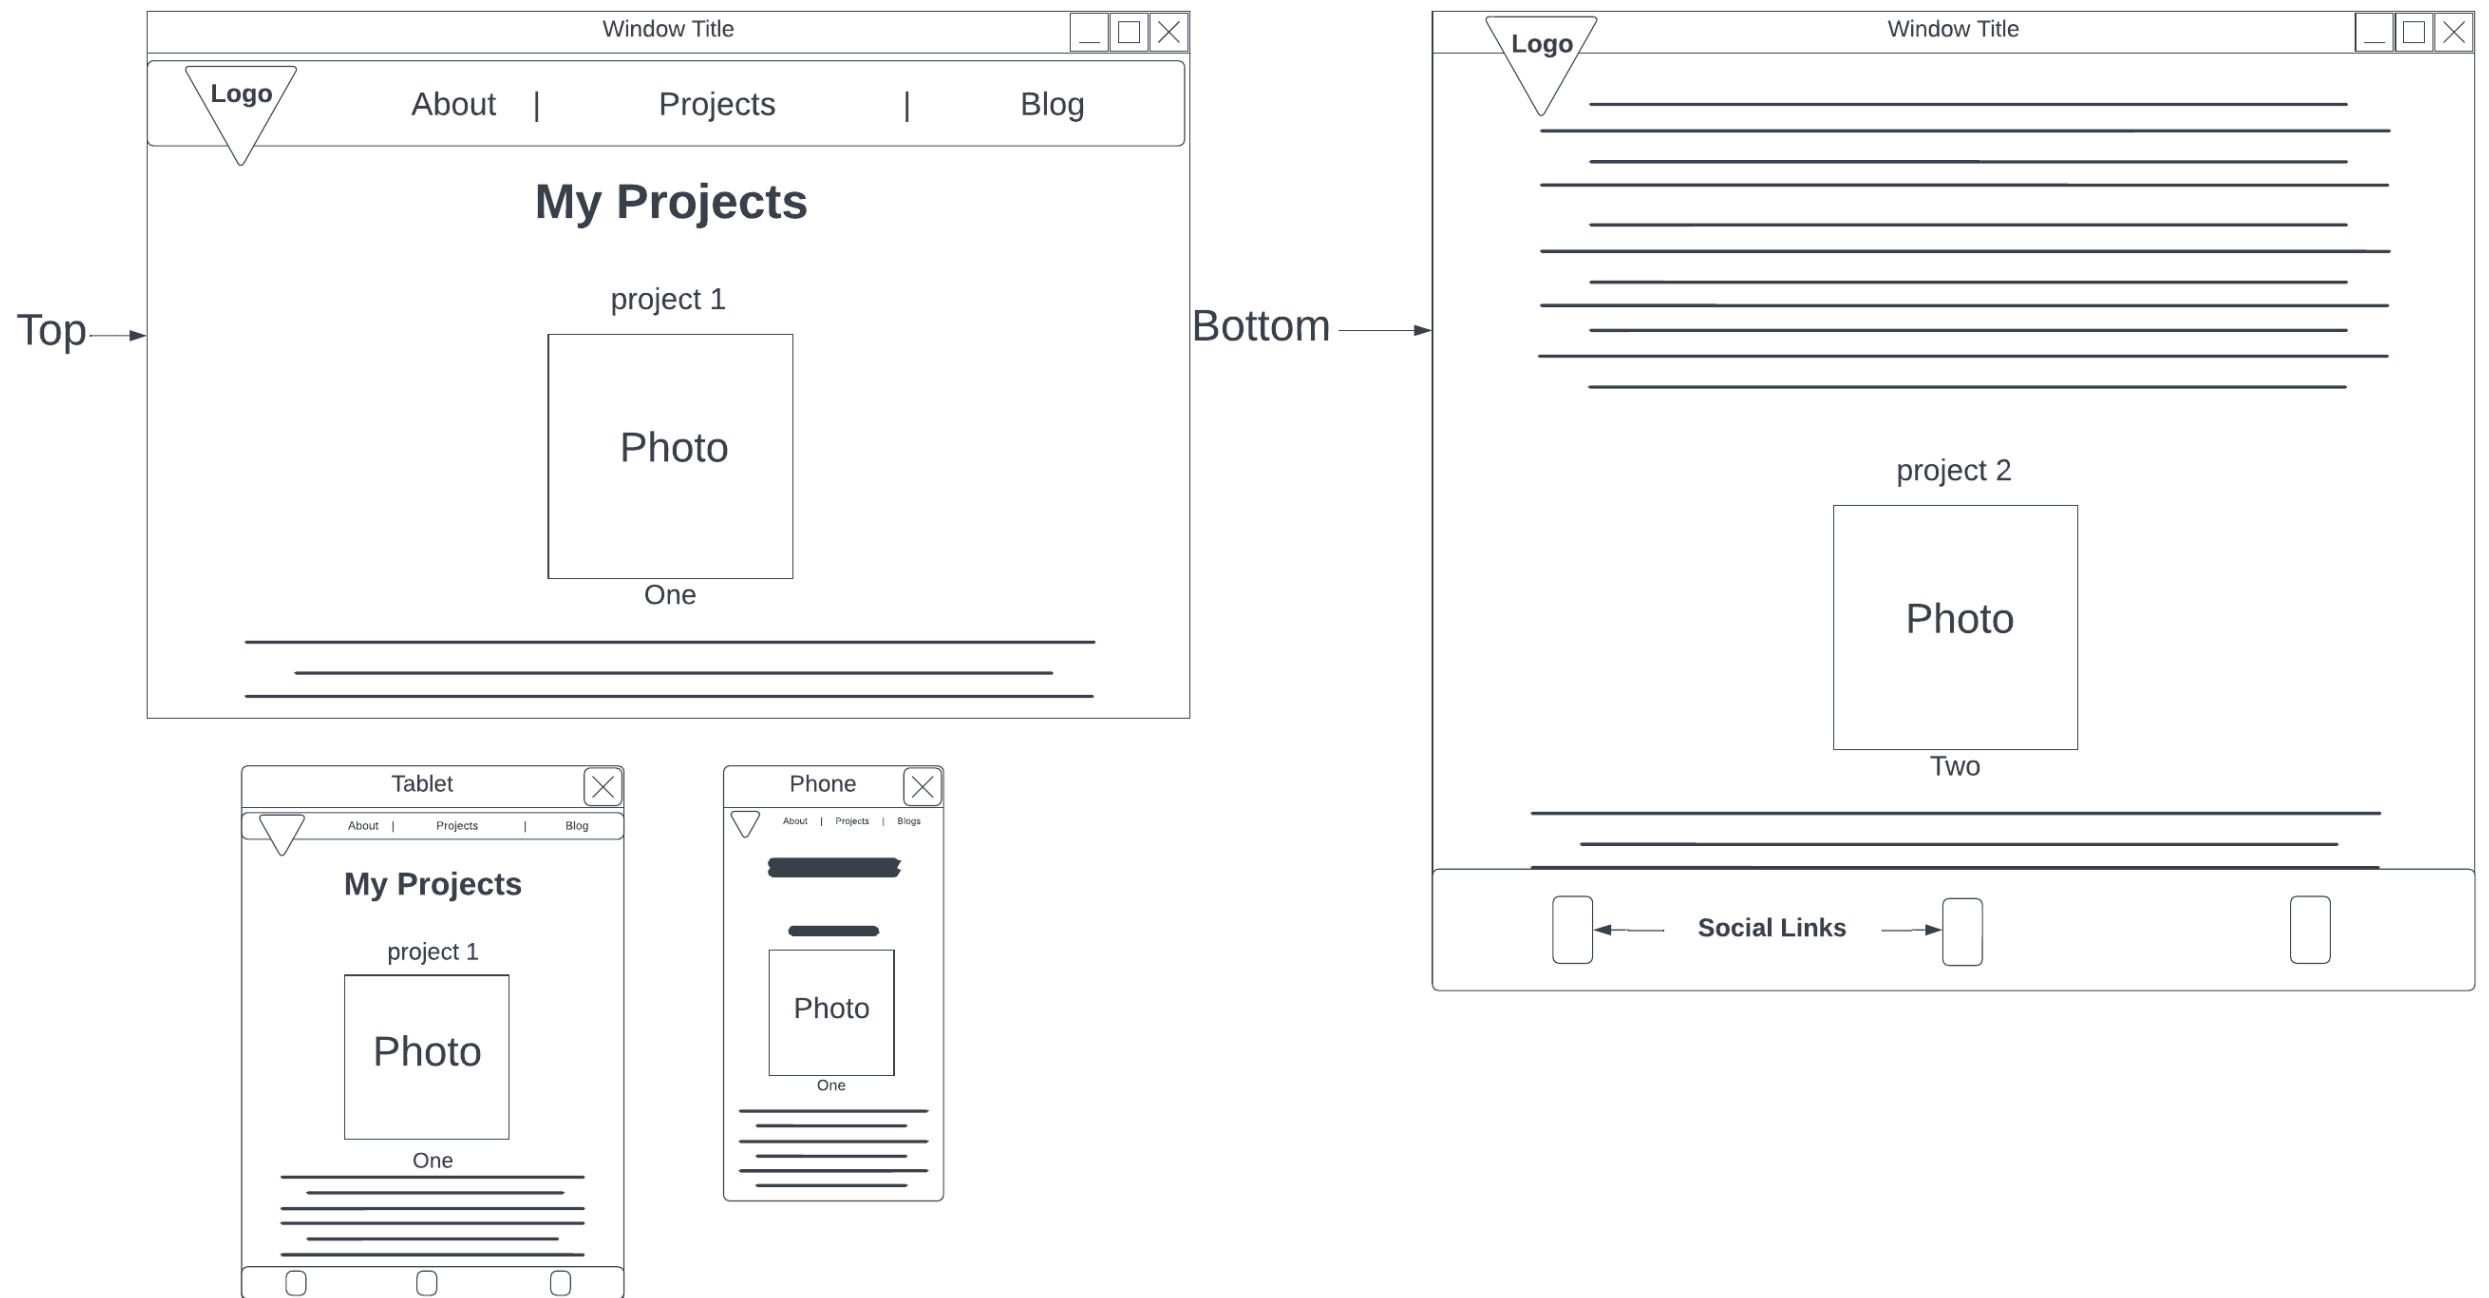

I added something that I really want to try which was to make the My story to look like it was being typed out. It was a lot more challenging than I first thought

A few things about myself including past work history with a [link](#) to my resume. As well as my hobbies

Some examples of my hobbies that can be click to go to my instagrams

Projects - wireframe
